Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 1-15 are being examined in this action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 102(a) as being anticipated by US Patent 2002/0054639 A1 to Kawashima et al.(hereinafter Kawashima) in view of US Patent 2003/0053702 A1 to Hu and further in view of US Patent 6957350 to Demos.

Regarding Claim 1,6,11, 18, Kawashima discloses the quantization scale factor control unit storing the scale adjusting factors where the first scale is greater than the second see Par. 0007-0008; encryption application to receive data and generating of quantized

by dividing video into first quantization scale see Par. 0012-0013 and encoding using variable length encoding see Fig. 1 item 11. But does not disclose generate supplementary data by subtracting the quantized data multiplied by first scale and generating quantized supplemental data by dividing by second scale & Par. 0102 & and encoding using variable length encoding. However, Hu discloses generate supplementary data by subtracting the quantized data multiplied by first scale see Fig. 1 item 125 and generating quantized supplemental data by dividing by second scale see Fig. 1 item 140. Demos further discloses the encryption see Fig. 13 item 1306. It would be obvious to one having ordinary skill in the art at the time of the invention to include in the invention of include generating of supplemental data in order to have a sample of image as disclosed by Hu see 0023.

Regarding Claim 2, 7,12, Kawashima discloses the MPEG4 standard being used to compress data see Par. 0055

Regarding Claim 4,9, 14, Kawashima discloses the compression using discrete cosine transform(DCT) see Fig. 2 item 22.

Regarding Claim 5, 10,15, Kawashima discloses the use of variable length encoding see Fig. 1 item 11.

Regarding Claim 3,8,13, Kawashima does not disclose the compression using motion prediction. However, Hu discloses compression using motion prediction see Fig. 1 item

Art Unit: 2132

185. It would be obvious to one having ordinary skill in the art at the time of the invention to include motion prediction in the invention of Kawashima in order to motion vectors to eliminate redundant instances of data see Par. 0139
